Our History

Humble Beginnings

The story of TradCo began nearly four decades ago when Graham and Denise Duff started producing restoration architectural hardware to sit neatly within Australia's historical homes. As the business grew, so did the range of designs. TradCo now offers over 4000 diverse products that stem from a range of design influences and are sold in over 600 stores across Australia and New Zealand.

Our Heart

TradCo was conceived in Adelaide, where its head office and central distribution point remains. This has enabled the business to retain its best employees, some of which have been with the company for close to 30 years. Staff from across the country and overseas have also joined the company, bringing with them experience which adds to the melting pot of ideas and innovations.

Trust

Our values, history and expertise have enabled TradCo to foster trusting, long term business relationships with our customers; understanding their unique requirements and providing convenient, timely solutions. If our people are the heart of our business, our strong service standard is what the company is built on.

Defining the Details

At TradCo we're driven by detail. You'll see it in each of our products. You'll see it in our stunning range of finishes. More importantly, you'll see and feel it each time you interact with one of our quality products within your space. We believe that when a house is finished with care it transforms— it becomes a home—a part of people's lives. We respect the history of every home, and love to restore old buildings to their former glory. Whether it be a hinge, light switch or door lever, every one of our products has been created with this in mind. These values allow us to define the details so that we can help enhance your home.

Quality You Can Feel

Nothing quite offers the strength, beauty and versatility of brass. We use high-quality brass, sand casting and forging methods to create products of unparalleled distinction, that are as durable as they are beautiful.

Selecting Your TradCo Hardware

At TradCo we believe that when a house is finished with care it transforms – it becomes a home – a part of people’s lives.

This hardware guide has been created to share our passion for design and to assist you to realise your design aspirations.

We know that selecting the right hardware for your home or project can be a daunting task, so we want to simplify that process.

By following each step in our hardware guide we’ll help you find the right styles, finishes and accessories to suit your home.

For further information and assistance please visit our website: tradco.com.au

Step 1 (Page 6)

Determine the architectural style of your home and select complementary door furniture

Step 2 (Page 9)

Select a finish to complement the colour scheme and style of your home

Step 3 (Page 12)

Determine whether your door needs a lock and choose the correct locking mechanism

Step 4 (Page 13)

Select the right hinges for your needs, available in a range of matching finishes

Step 5 (Page 14)

Select matching accessories to your selected door furniture

Step 1

Determine the architectural style of your home and select complementary door furniture:

Colonial

2005

Page 34

Step 2

Select a finish to complement the colour scheme and style of your home:

Polished Brass (PB)

A warm accent

- A classic polished and lacquered finish.
- Finish will age and tarnish over time, developing a unique character.

Durability

Satin Brass (SB)

Soft pops of colour

- Lightly brushed on a polishing wheel for a contemporary look.
- To keep Satin Brass looking stunning year-round, keep dry and clean regularly with a soft cloth.

Durability

Unlacquered Polished Brass (UPB)

Classic aged charm

- A classic polished and unlacquered finish.
- Designed to age gracefully and naturally, the unlacquered polish will wear through use to develop distinct colour and a timeless aged look.

Durability

Unlacquered Satin Brass (USB)

Contemporary meets classic

- Lightly brushed on a polishing wheel for a contemporary look.
- This modern unlacquered finish will age naturally over time to offer seamless application in both classic and contemporary spaces.

Durability

Antique Brass (AB)

Earthy undertones

- Each product in this finish is hand aged, meaning each product has its own distinct variation and depth of colour, reflecting a mix of lighter and darker finishes.
- This unique finish is designed to wear and age naturally over time, developing beautiful variations in the depth of colour.

Durability

Step 2

Select a finish to complement the colour scheme and style of your home:

Antique Copper (AC)

A great heritage look

- Each product in this finish is hand aged, meaning each product has its own distinct variation and depth of colour.
- Designed to age, this finish will continue to wear and form distinct characteristics that look beautiful at every stage of its life.

Durability

Matt Black (MB)

Timeless all rounder

- This highly-durable finish is achieved through powder-coating or an ageing process depending on the product.

Durability

Chrome Plate (CP)

Sleek and adaptable

- Chrome plating not only looks stunning but is incredibly durable.
- This finish will remain at its best for years to come with occasional cleaning to maintain its lustre and brightness.

Durability

Satin Chrome (SC)

Modern and refined

- We achieve this finish by carefully brushing Chrome Plate to remove shine and develop a sleek satin finish.
- Occasional cleaning will keep this highly-durable finish looking its best for years to come.

Durability

Rumbled Nickel (RN)

Character filled

- This unique finish is achieved through traditional methods to create something truly special.
- Nickel-plating is aged before each product is 'rumbled' with small stones to reveal glimpses of the nickel through the antique finish.

Durability

Polished Nickel (PN)

Elegant neutral

- A highly durable finish that is warmer than chrome.
- Highly polished nickel-plate gives this finish its beautiful depth of colour.
- Regular cleaning will maintain the lustre of this finish.

Durability

Satin Nickel (SN)

Understated and chic

- Soft to the touch and exhibiting warm hues.
- To achieve this finish, nickel-plated brass is very lightly finished, before being plated with satin nickel.

Durability

Other finishes you may come across

- BR** - Brown
- BL** - Black
- WH** - White
- IV** - Ivory
- PM** - Polished Metal
- AF** - Antique Finish
- PVD** - Anti-tarnish Brass
- EB** - Electro-plated Brass

Step 3

Choose the correct locking mechanism:

Passage Set

Used when a door doesn't need to be locked.

Tube Latch

Lever on Rose Passage Set

Used when a door doesn't need to be locked.

Tube Latch

Privacy Set

Ideal for bathrooms, they have a thumb turn for privacy.

Tube Latch

Privacy Bolt

Privacy Lock

Lever on Rose Privacy Set

Ideal for bathrooms, they have a thumb turn for privacy.

Tube Latch

Privacy Bolt

Privacy Turn

Rebated Locks

Rebated doors are commonly referred to as french doors, they are designed to interlock to avoid swinging open.

Rebated Euro Lock

Euro Cylinder

Flush Bolt (french doors)

Step 4

Choose the most appropriate hinge for your door type – consider height, weight and door thickness.

All TradCo hinges are solid brass and supplied with matching stainless-steel screws, solid brass screws are also available.

Ball Bearing

- A premium hinge
- Durable, smoother and quieter
- Can be used on solid core doors, both external and internal (including some oversized doors)

Fixed Pin (Butt Hinge)

- Standard choice for internal or external doors which are not too heavy
- Mortice flush into jam and door

Hirline

- Easy to install, don't need to be recessed into door
- For internal light-weight doors

Loose Pin

- Loose pin enables easier removal of doors; simply remove the pin rather than unscrewing the hinge
- For internal doors only

Broad Butt

- Great for doors that need a wide throw or to open parallel to the wall
- Often used on double or french doors

Lift Off

- Typically used on toilet and bathroom doors so that in an emergency the door may be removed easily without unscrewing the hinge

Parliament

- A traditional version of the Broad Butt hinge

Step 5

Match accessories to your selected door furniture:

Match your lever or knob to other front door accessories. For example, knockers, bells and centre door knobs.

21350 UPB - Victorian Lever in Unlacquered Polished Brass, gracefully ageing over time • Page 22

Unlacquered Finishes

Unlacquered brass finishes are natural living finishes that patina beautifully with use, creating a raw, unpretentious, rich and layered look. Dulled by age, and naturally polished from regular touch, these finishes are character-filled and perfectly suited to a TradCo restoration home.

With no protective coating on the brass, depending on location and environmental factors, it can take as little as two days or as long as two years for the metal to age, darken and develop to this charming, aged state. The natural beauty of the unlacquered brass ageing process creates an organic quality with distinct darkened colour and variations in texture, that it is continually changing and developing in your home over time.

This low-maintenance finish is ideal for those with a love for beautifully aged hardware.

Unlacquered polished brass and unlacquered satin brass finishes are available on selected products in the TradCo collection.

Switches are 10 AMP – 2 way. Dimmers and fan controllers are variable speed and require a switch to turn on and off. Dimmers are 400VA, suitable for most applications including low voltage downlights and incandescent lights. Important: Only dimmers with the '/250' suffix are LED compatible. Before ordering LED compatible dimmers please read carefully 'Using Tradco Dimmers with LED Lights' – available to download from our website. Please refer to your fan data specs for compatibility with HPM fan controllers.

Accessories are not suitable for use with power points.

Dimmers and fan controllers are variable speed and require a switch to turn on and off. Dimmers are suitable for most applications including low voltage down lights and incandescent lights.

Important: Only dimmers with the '/250' suffix are LED compatible. Before ordering LED compatible dimmers please read carefully 'Using TradCo Dimmers with LED Lights' – available to download from our website.

Standard switch mechanisms supplied are 10 AMP – 2 way, 15 and 35 AMP mechanisms are available (rocker only). 3 way intermediate rocker switches are available (to suit flat plate ranges only).

These products are ordered in addition to your TradCo switches, and will arrive unassembled.

Door Lock Technical Information

Find technical information on our range of locks below.

Remember – if your door doesn't need to lock, you simply need a tube latch (Page 56) to make it function. If you are trying to replace an existing lock, simply remove it from your door, measure it and compare it with the sizes and types on our website to determine what you need.

External Doors

Key type:

- If you're after a traditional 'old style' key, choose the skeleton key¹. This key is used with a 5 lever lock.
- If you'd prefer a modern looking key, choose the euro key². These keys can be easily replicated, changed or keyed by a locksmith, and require a euro cylinder³.

Door type:

- Regular single doors with a stile 110mm or greater require a 5 lever/euro mortice lock with standard 57mm backset.
- Regular single doors with a stile 90mm or less require a 5 lever/euro mortice lock with standard 46mm backset.
- If the measurements of the stile are between the above measurements you can use either lock, however, your lock will not be centered on the door stile.
- If your double or french doors are rebated, you will require a rebated lock. The above measurements also apply to rebated locks⁴.

Technical Information

Find technical information on door lever handing and lift-off hinges below.

Left and Right Hand Door Levers

Determined by which hand you use to open an inward opening door. Simply add 'LH' for left hand, or 'RH' for right hand, to the end of any door furniture code when ordering half sets.

Left and Right Hand Lift-off Hinges

Lift off hinges allow a door to be removed from the outside when locked during an emergency.

Internal Doors

Privacy:

If your door needs a thumb turn privacy function (e.g. bathroom, bedroom, toilet, etc.), there are 2 options you can choose from:

1. Long backplate privacy door furniture: you will require a privacy mortice lock⁵ with a privacy adaptor⁶ (adaptor included with all privacy door furniture).
2. Door knob / lever on rose: these products require a separate privacy bolt⁷ and privacy turn⁸.

Lock type

- If your internal door needs to lock with a key, you'll need a 3 lever mortice lock (skeleton key)⁹.
- If you have rebated double doors, a rebated 3 lever mortice lock¹⁰ is required.

Scan to discover a range of helpful resources on the TradCo website. Find installation guides, templates and videos, warranty information, digital catalogues and more.

Window Guide

All products are available in a wide range of finishes, please check catalogue or website for more details.

Casement Windows

Base Fix Casement Stays

Used to hold the window open, the "arm" is attached to the window frame and pins to the sill. Casement stays allow the window to be opened by lifting the arm and pushing out the window. The stay has holes along it so the window can be held open by using the pins located on the sill.

1708 PB

Base Fix Telescopic Casement Stay

These stays attach to the window and the window sill. When the knob is released, the window can be pushed out to the desired opening. The button or key can then be engaged at varying intervals to hold the window open.

1824 MB

Key Lockable Telescopic Stay

1674 PVD

Sidemount Casement Window Stays

These are installed on the side of the window and frame, they hold the window open in various positions and hold the window closed with the arm going into the keeper on the frame. This product eliminates the need for a casement fastener.

2314 AB

Casement Fasteners

Used to fasten the window in place when closed. Supplied with surface mounted keeper for double windows and a flat keeper for single windows.

1741 AC

1839 MB

1778 SC

9805 SN

For image reference of casement fasteners please refer to Page 87

They are also available key lockable - *Please note these are handed Left and Right.

Awning and Hopper Windows

Hopper Windows (Opens Inwards)

Awning Window (Opens Outwards)

Spur Catch

Spur catch used on awning windows. (Opens Outwards)

1757 CP

Quadrant Stays

Normally used for outward opening awning windows that are hinged on top or bottom. Can be used in conjunction with the spur catch above. A quadrant stay is used to hold the window open.

1704 PB

Quadrant Stay sequence

Hopper Window Catch

Used on hopper windows –open inwards. Supplied with both flat and surface mounted keeper. The flat keeper is for single window use and sits on the frame. The surface mounted keeper is used for hopper windows that sit flush with the frame.

9643 MB

Hopper Window Catch sequence

Window Guide

All products are available in a wide range of finishes, please check catalogue or website for more details.

Sash Windows

Single or double windows which have one fixed sash and another that slides up and down. All hardware fittings come in various finishes.

Sash Window

Sash Lifts

Used to lift the sash.

1631 PB

Sash Fasteners

Used to lock the window when closed.

1631 PB

Sash Drops

Used to hold the window open at a desired height. Swings freely when not in use.

1625 SC

*Two Sash Lifts are normally required per window.

Fanlight Windows

Fanlight windows are windows above a door, they can be hinged top, bottom or middle and open in or out.

Fanlight window operators sequence – total opening and closing solution for a fanlight window. Can be used on fanlight windows hinged at the top, middle or bottom opening inwards or outwards.

1787 CP

Fanlight Catch, Swivel and Stay & Pole Hook

Fanlight Catch

These four products are often used together for a complete fanlight window operating system.

Fanlight Catch

Suitable for fanlight windows hinged at the bottom opening inwards. Used at the top of the window.

1781 PB

Pole Hook

Attach to the end of a broomstick to open your fanlight catch.

1782 PB

Fanlight Stops

Fanlight Swivel

Two required for both sides of window. They allow the window to pivot – similar to a hinge on a door.

1780 PB

Fanlight Stop

Two required for both sides of window. Used in conjunction with a fanlight catch, the fanlight stop limits how far the window opens.

1783 PB Pair

Glossary of Terms

Awning Window

A window that is hinged at the top or bottom and swings out.

Backplate

A flat plate that an object such as a lever, knob or pull handle sits on and attaches to the door, wall or furniture. Backplates can come in many different sizes and shapes and can often be punched with a key hole.

Backset

The distance from the edge of the door (front of the lock or latch face plate) to the centre of the door handle/spindle hole. Standard backset sizes are 45mm or 60mm.

Barrel Bolt

A bolt which is mounted to the door face and locks into a striker plate on the door jamb/frame to hold the door closed. Barrel bolts can also be used on windows and come in a variety of different lengths.

Broad Butt Hinge

A hinge that is wider than it is tall. It allows a door or window to swing clear of the architrave and lay flat against the wall. Normally used on double or french doors.

Casement Window

A window that is hinged on the side and swings open like a door. Casement stays are used to hold these windows open. Casement fasteners hold them closed.

Centre to Centre

The vertical distance measured between the centre-points of spindle and key hole. Also used to describe the distance between bolt or screw holes on pull handles and other products.

Door Jamb

One of the two vertical timbers forming the sides of a door frame that a door closes against.

Key/Key Euro Cylinder

A cylinder that is keyed both sides and usually used on external doors in combination with a euro mortice lock.

Double Hung Window

Also called sash windows. Top and bottom sashes that slide up and down. The bottom sash slides up and down and the top sash also opens and closes.

Dummy Handle

Door knob or lever that is surface mounted to a door and does not work a latch. Dummy handles are installed using a taylor spindle or similar product that prevents the lever or knob from turning. Dummy handles are often used on linen cupboards or the secondary door in a double or french door set.

Escutcheon

A key hole cover.

Face Plate

Refers to the piece of metal that surrounds the latch tongue and/or locking bolt of the door lock.

Fanlight Window

Fanlight windows are windows above doors. These can be hinged at the top, bottom or middle and can open inwards or outwards.

Rebated Doors

Rebated double doors have a lip on the vertical edge where they meet, called a 'rebated meeting stile'. There is a primary door, which can open and close without affecting the secondary door. If the secondary door is opened, it needs to close fully into the frame before the primary door. Rebated doors create a seamless look with no gap between the doors and help in reducing drafts. A rebated lock or latch with a special shaped face plate is required to fit this type of door.

Rim Lock

A low security, old-style lock which is mounted to the surface of a door.

Rose

A round or square backplate that accommodates a door knob or lever.

Sash Window

Also called single or double hung windows. The bottom sash slides up and down and is supported internally by a pulley and weight system.

Sash Lift

A finger lift mounted to a window sash to allow it to be raised. Normally two are used per window.

Sash Fastener

Mounts to the top of the lower sash and locks into the catch which is attached to the bottom of the upper sash. This prevents the window from being opened.

Sash Pulley

Used in conjunction with sash cord and weights to allow sash windows (double or single hung) to open.

Skeleton Key

A skeleton key is an old-style key which operates a mortice or rim lock.

Spindle

A square bar to which a door knob or lever attaches. These can also be threaded to accommodate screw-on door knobs.

Spindle Hole

A square hole in a lock or latch which a spindle goes through to operate the latch tongue or mortice locking bolt.

Striker Plate

A metal plate attached to the door jamb, which houses the extended latch or locking bolt when the door is closed.

Glossary of Terms

Stile

The vertical panels of timber on the outer edges of a door or a window sash. The width is measured from the edge of the door to where the glass or panelling starts.

Taylor Spindle

A threaded spindle attached to a small backplate that is used in conjunction with a dummy door handle. The Taylor spindle is attached to the door and the dummy handle sits on it to prevent the handle from functioning.

Key/Thumb Cylinder

Incorporates a key to lock and unlock your door from the outside and a thumb turn mechanism on the inside to lock or unlock your door. Used in conjunction with a euro mortice lock.

Tubular (Tube) Latch

Installed into the edge of the door to hold the door shut when closed and is operated by a knob or lever via the spindle. TradCo tube latches are available in 45mm, 60mm or 70mm backset.

Quadrant Stay

A stay used on either awning or hopper windows to hold the window open. Two stays are normally used per window.
